

```
import java.util.Scanner;

public class code48 {
    public static void main(String[] args) {
        Scanner scanner= new Scanner(System.in);
        System.out.println("Enter number = " );
        int n = scanner.nextInt();
        int s=1;
        while(n>0){
            s=s*(n%10);
            n=n/10;
        }
        System.out.println("s = "+s);
    }
}
```
