

```
import java.util.Scanner;

public class test67 {
    public static void main(String[] args) {
        Scanner scanner= new Scanner(System.in);
        int p=0;
        for(int x=1;x<=100;x++){
            System.out.println("Enter number"+x+"=");
            int n=scanner.nextInt();
            int m=n;
            int s=0;
            while(n>0){
                s=s*10+n%10;
                n=n/10;
            }
            if(s==m)
                p=p+1;
        }
        System.out.println("p="+p);
    }
}
```
